

BAM Energie

BAM Energie offers the customer a complete approach to the design and realisation of power plants and related installations in the energy sector. This approach provides the customer with flexibility, security, creativity, and quality, thereby adding value.

Company profile

BAM Energie bundles the knowledge and capacity of the different operating companies within the Royal BAM group. We add value for the customer by offering a wide and attractive range of services under a single banner and, where necessary, through a single point of contact. We achieve this added value through efficiency and more effective cooperation, but principally through the security engendered by the bundled knowledge and skill that we are demonstrably able to offer. Royal BAM Group are second to none when it comes to developing efficiency and security, because of the unique infrastructure and range of companies and specialities that we can employ.

Several permanent partners are involved in BAM Energie. Namely BAM Civiel, BAM Leidingen & Industrie, BAM Techniek and Tebodin. All these parties contribute their knowledge and skill to BAM Energie. Depending on the specific project, expertise can be drawn from both within and without the Royal BAM Group. Using the knowledge gained from previous experience, tailor-made solutions can be made for every project.

Projects
