

BAM Techniek BV

BAM Techniek is an independent company that is part of Koninklijke BAM Groep nv. In 2008, BAM Techniek achieved a turnover of more than € 200 million, and the organisation has approximately 1400 experienced and well trained permanent employees, spread over 17 locations in 15 different cities.

Company profile

BAM Techniek designs, realises, maintains and manages technical installations for both construction and renovation projects in utility building, infrastructure and industry. As a contractor of mechanical and electrical engineering projects, BAM Techniek has grown into an expert company with an integrated project approach and highly qualified staff in various specialist areas. All BAM Techniek locations are independent units, specialised in installations for clients in the Utility, Industrial and Infrastructure markets. BAM Techniek has knowledge, experience and specialist know-how in the following disciplines:

Electrical engineering The realisation of and maintenance to electrical installation for Industrial, Infrastructural and Utility projects, with a specialisation in automation, telematics, security and control engineering.

Automation Realisation of process control/process visualisation systems for Industrial and Infrastructure projects.

Mechanical engineering Realisation of installations for climate control and energy management.

Sprinkler technology Installation and maintenance of security and sprinkler installations.

Our specialised Technical Management department gets all technical installations in an optimum condition and keeps them there. A nationwide network of service points provides support 24 hours a day.

A large amount of individual responsibility and short lines of communication guarantee a high degree of efficiency. This has led to an increasing number of successful projects for clients from the Industry, Chemistry, Infrastructure, Technology, Utilities and Technical Management markets. As a part of Koninklijke BAM Groep nv, BAM Techniek is capable of realising integrated multidisciplinary projects in the areas of construction and renovations.
